# Excursion to Senegal

# Pilgrimage & MEMORY

04.08.-25.08.2024

The three-week excursion to Senegal allows insights into practices and places of cultural memory and pilgrimage that bring together different religious traditions and forms of remembering: the island of Gorée, the Monument de la Renaissance, the large mosque in Touba, the Marian shrine of Popenguine, the Monastery of Keur Moussa and the Muslim-Christian cemetery in Joal-Fadiouth.

Reading sessions, lectures and short trips provide an understanding of how these transreligious pilgrimage sites become places for negotiating identities and different meanings.

This excursion is aimed primarily at those interested in anthropology, theology, religious studies and history
